

Alex Example

B.Sc. Information Technology | M.Sc. Data Engineering

City, Country your.email@example.com your-website.example your-linkedin your-github

Summary

Data Engineering graduate with experience building end-to-end ETL/ELT pipelines using Python, SQL, Apache Airflow, PySpark, Docker, PostgreSQL, and Terraform. Experienced in data processing, pipeline automation, cloud infrastructure, and analytics dashboards. Seeking data engineering and data analytics opportunities.

Education

University Name , MSc in Data Engineering – City, Country Focus: Data processing, data pipelines, cloud computing, machine learning	Sept 2024 – present
University Name , BSc in Information Technology – City, Country	Sept 2015 – Dec 2020

Experience

Data Engineering Student / Projects , University Name – City, Country • Developed data engineering and machine learning projects using Python, SQL, Apache Airflow, Apache Spark, and Docker. • Designed ETL pipelines, data processing workflows, and analytics solutions as part of graduate-level projects.	Sept 2024 – present
IT Officer , Technology Company – City, Country • Supported enterprise applications, IT infrastructure, user access, and system administration. • Maintained local networks and provided hardware and software support.	Nov 2023 – Aug 2024
IT Support Specialist , Non-Governmental Organization – City, Country • Provided technical support, system administration, and user-access management across departments. • Supported digital data-collection systems and trained users on data-collection tools.	Nov 2021 – Oct 2023
Software Developer , Software Development Company – City, Country • Developed backend services and REST APIs using PHP and a lightweight web framework. • Integrated application services and tested APIs using Postman.	Sept 2019 – Feb 2020

Projects

Smart City Traffic ETL Pipeline

- Python, Airflow, PySpark, Docker, PostgreSQL, Terraform, Superset
- Designed and implemented a reproducible micro-batch ETL pipeline for traffic data processing.
 - Built a Bronze/Silver/Gold data architecture with PostgreSQL as the analytical data store.
 - Implemented automated retries, data validation, logging, and schema-driven pipeline configuration.
 - Developed analytics dashboards in Apache Superset for monitoring traffic and pipeline metrics.

IoT Sensor Data Pipeline

- Arduino, ESP32, Python, FastAPI, PostgreSQL, React
- Built an end-to-end IoT pipeline for collecting temperature and humidity sensor data.
 - Developed a FastAPI service for data ingestion and stored sensor readings in PostgreSQL.
 - Created a React dashboard for visualizing current and historical sensor measurements.

Machine Failure Prediction

- Python, Pandas, Scikit-learn, Machine Learning
- Developed machine-learning models for predicting equipment failure.
 - Applied data preprocessing, feature engineering, model training, and performance evaluation.

Financial Data ETL & Prediction Pipeline

- Python, Apache Airflow, ETL, Sentiment Analysis, Machine Learning
- Developed an automated Airflow ETL workflow combining financial market data with news sentiment analysis.
 - Applied data processing and machine-learning techniques to predict short-term market direction.

Skills

- Programming:** Python, SQL, PHP, C++, JavaScript, React, FastAPI, Flask
- Data Engineering & Processing:** ETL/ELT, Apache Airflow, PySpark, Pandas, NumPy
- Cloud & Infrastructure:** Docker, Terraform, AWS, Infrastructure as Code
- Analytics & BI:** PostgreSQL, Apache Superset, Data Visualization
- Version Control:** Git, GitHub

Languages

- English:** Fluent
- German:** Beginner
